Location

Chachoengsao, Thailand

OBJECTIVE

Motivated Information Technology student seeking an internship opportunity in Full-Stack Web Development. Possesses a strong foundation in both frontend and backend programming, with hands-on experience in building real-world web applications using modern frameworks and technologies.

EDUCATION

2022 - 2026

GPAX - 3.29

King Mongkut's University of Technology North Bangkok

Bachelor of Science Program in Information Technology

2018 - 2021

GPAX - 3.14

Phanomsarakham Technical College

Certificate of Vocational Education in Electronics

PROJECT

2025

Expense Tracker Web Application

Independent Project

- Developed a full-stack Expense Tracker web application with Supabase as the backend and Google authentication via Supabase Auth.
- Implemented features for logging income and expenses, categorizing transactions, and summarizing data with monthly and category-based views.
- Focused on responsive UI and interactive data visualization using charts to help users better understand their spending habits.

2024

E-Commerce Web Application

Student Project - Javascript Programming

- Developed a full-stack E-Commerce web application as a student project, featuring product browsing, cart management, and user login/register system.
- Built a custom admin dashboard to manage product listings and track user orders. Tested performance of different database query strategies.

2024

Gawsdle

Independent Project

- Gawsdle is a character-guessing game inspired by Loldle, designed for fans of Genshin Impact and Honkai: Star Rail. Players must guess a character based on limited information and hints such as element, weapon type, rarity, or region.
